- Same dome housing used in operational cameras
- Exclusive inner dome liner eliminates viewing into empty dome
- Size: 3" diameter, 2.5" tall
- Kit includes:
 - Dummy dome camera
 - Mounting hardware

SLC-100 Dummy Dome Camera

When the appearance of a closed circuit surveillance system is required, the Security Labs SLC-100 allows for an economical solution. This SLC-100 utilizes the same housing as a operational dome camera but is shipped without the CCD camera inside. Quick to install with normal hand tools, the SLC-100 can be used to create the appearance of cameras when no system is present, or to supplement an operational system. The area inside the dome is not visible to the observer.
