

SLC-1045

Vandal Proof Color Dome Camera

security labs

Features

- Camera type: 1/4" color Super HAD CCD
- Video: NTSC, composite 1V p-p, 75 ohm
- Light sensitivity: 0.5 LUX
- Iris: auto electronic
- Resolution: 330 lines
- Lens: 3.7mm, pre-focused
- Power: 12VDC, 120 ma, 2.1mm jack
- Weight: 1.25 lbs
- Diameter: 5.5" (base)
- Height: 3.25"
- Connections: RCA type video jack
- Torx T15 type case screws (4)
- Kit includes:
 - 12VDC power supply
 - 50' video-power cable
 - Mounting hardware

SLC-1045 Weather & Vandal Proof Dome Camera

The SLC-1045 is the camera solution when protection is needed from both the weather and tampering. This dome camera incorporates a high performance color Super HAD CCD camera. The steel base utilizes four heavy duty Torx type screws to prohibit unwanted tampering with the camera. During installation, pan & tilt can be adjusted 360 by 90 degrees. An oversized weatherproof seal locks the camera away from the environment. A wide angle (3.6mm) lens provides a 18' vertical by 24' horizontal viewing range at 20'.

Ceiling mountable, the camera kit includes a power adapter, 50' video-power cable, and mounting hardware. The integrated video-power cable allows the installer to place the power adapter at the end of the cable run (at the monitor, recorder, or multiplexer). The video connection is terminated with a RCA type connector to facilitate connection to monitors, recorders, or televisions with a video in jack.
