

SLC-131

Waterproof B/W Camera w/ IR

# security labs

## *Features*

- Camera type: 1/3" CCD B/W
- Video: NTSC, composite 1V p-p, 75 ohm
- Light sensitivity: 0.001 LUX @ 5' (IR)
- Iris: auto electronic
- Resolution: 400 lines
- Lens: 3.6mm, fixed focus
- Power: 12VDC, 150 mA, 2.1mm jack
- Weight: 7 ounces
- Size: 2" length x 1.5" diameter
- Connections: RCA male video plug, 2.1mm DC jack
- Temperature Range: 10 to 130 Deg. F.
- Infrared Illuminators: Built into camera to view in total darkness / underwater.
- Housing: **Watertight body up to 90'**
- Kit includes:
  - 12VDC power supply
  - 65' video-power cable
  - Swivel mounting bracket & hardware

## **SLC-131 Waterproof Camera**

Built to withstand the pressure in 90' of water, the SLC-131 incorporates a Sony chipset for crisp image reproduction. Automatic video AGC and six infra red illumination LEDs allow the camera to see when no visible light is present. IR illumination incorporated in the camera will light the viewing area in front of the camera to see a visitor at an entry door, or to locate property lost in dark waters. The SLC-131 is supplied with an adjustable swivel mount, regulated power supply, hardware, and 65' of video/power cable (attached). Small in size for a high performance camera, the SLC-131 measures only 2" by 1.5" in diameter.
