- Housing: Watertight body up to 90'
- Kit includes:
 - 12VDC power supply
 - 65' video-power cable
 - Swivel mounting bracket & hardware

SLC-134C Color Waterproof Camera

With outstanding color image reproduction, the SLC-134C can be used in any color surveillance application. Submersible to 90', the SLC-134C is truly a waterproof camera, designed to withstand even the worst downpour. A CCD imager by Sony delivers clear, crisp color. A streamlined steel tube only one inch in diameter allows the camera to be easily hidden in most applications. Viewing angles are quickly adjusted with the swivel mounting bracket (supplied). Also included is a regulated power supply, mounting hardware, and a 65' video / power cable.
