

SLM427

12" B/W Quad Observation System w/ Four Cameras

security labs

Features

- 12" B/W high resolution monitor with built in digital video processor & commercial case.
- System includes four weatherproof cameras (SLC-144) with built in PIR motion detection to alarm the monitor, infrared emitters to see in total darkness, and two way audio.
- View up to four cameras simultaneously. At the touch of a button, switch to 2 camera PIP (picture in picture), 3 camera PIP, or auto sequence cameras in full screen or PIP mode.
- Two way intercom allows the user to hear and speak to each camera.
- Freeze and zoom functions enable stop motion and 2x zoom to any location on the monitor.
- On screen time and date, individual camera titling, and video loss alarm.
- When the motion alarm function is activated, motion at any camera signals the monitor to display full screen with a programmable audible alert.
- Alarm outputs can activate a DVR, VCR, or other device.
- Any connected VCR can be monitored live to ensure recording status. RCA type video/audio in and out jacks are located on the rear panel.
- Power: 120VAC. Dimensions: 12."W x 12"D x 12"H. Shipping weight: 31 lbs.

Four SLC-144 weatherproof cameras are included in the system. Each camera includes 50' cable, swivel mount, mounting hardware.

WARNING STICKERS to deter theft - two "Surveillance System in Operation" warning labels are included. These labels are double sided and UV enhanced to help prevent fading.
